

Microphor Chlorinating Slugs

The only officially recognized chlorinating product for use with Microphor sanitation systems. In addition to labeling which identifies its use for sewage systems, the design was engineered by Microphor specifically for use in our treatment systems. The Microphor chlorinating "slugs" are uniquely shaped like an "X" and, as such, are easily recognized.

Product Benefits

- Unique shape provides greater surface area for contact with effluent stream
- Greater duration per "slug", extending time necessary to refill the chlorinating slug holder by at least 50% over our old 1" tablets
- Supplied in a sealed 25 pound pail containing 50 "slugs"
- Bridging, common with old style tablets, is eliminated
- "Slugs" can be flat stacked in an extended chlorinator fill tube if so desired
- One chlorinating "slug" per bag makes storage of an open pail easy and safe
- Can be used in all Microphor chlorinators
