

It Keeps Odors In Your Holding Tank And Out of Your RV!

Introducing the Odor Shut-er[®]

Here's a new product for RV owners concerned about holding tank odors. The Odor Shut-er is a **new** type of toilet sealing ring with flexible 'shutters' to **keep odors in holding tanks and out of bathrooms.**

Designed for all makes of drop-through style toilets, the Odor Shut-er guards against unwanted smells and provides, just as importantly, a visual barrier.

One of the unpleasant problems with drop-through toilets is that during the flush cycle you can see into the holding tank below and odors can rise into the room, making it smell more like an outhouse than a bathroom!

The Odor Shut-er provides **a barrier to sights and smells.**

It's **easy to install**, simply replace the existing toilet sealing ring between the toilet and the floor.
