

# MicroJet

LOW VOLUME  
MARINE HEADS

## Models LF-710 & LF-719

**NEW**

MicroJet Toilets are designed for use in applications where additional comfort is desired. The high quality vitreous china model is easily cleaned and maintained. Using up to 50% less water than conventional jet flush toilets, the marine head provides excellent economical benefits, while solving both water supply and sewage disposal problems. The waste is transported completely and efficiently. Available in a range of designer colors.

### SPECIFICATION DATA

Each MicroJet head shall be vitreous china, rear or bottom discharge, floor mounted, low volume water use type manufactured by Microphor, Willits, California, USA. The flushing mechanism shall be a push button activated water jet flush. The flushing cycle is adjustable. Sufficient water shall be left in the bowl to prevent a "dry bowl" condition when the toilet is not flushing. The toilet requires water at 60 PSI static and a sustained flow of 30 gpm at 30 PSI minimum. Models are available in round or elongated bowls. Voltage options are 12 or 24 volt DC.

### GENERAL INFORMATION

Installation of the MicroJet marine head is similar to a conventional toilet and is suitable for replacing either standard fixtures or for use in new boat construction. The following are general installation requirements.

**WATER SUPPLY** - Water is to be supplied to the toilet by a reinforced 1" water line with water supply at 60 PSI static and a sustained flow of 30 gpm at 30 PSI minimum.

**MOUNTING BOLT CAPS** - Mounting bolt caps are provided with models specified.

**SHIPPING INFORMATION** - Weight: 100 lbs

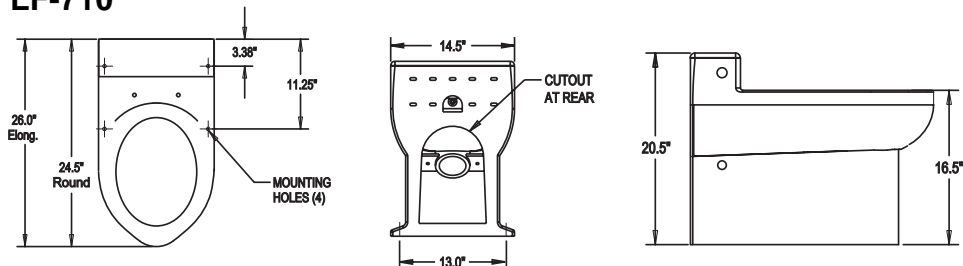

**TOILET SEAT** - Toilet seat post holes are on 5-1/2" centers. Toilet seat included.

**WARRANTY** - Detailed warranty available upon request.

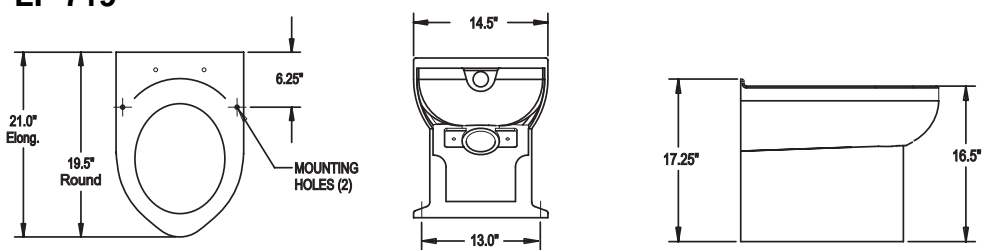

### ROUGH-IN DIMENSIONS
